

Reducing the risk of wound infection*

Microlyte® is a synthetic matrix containing antimicrobial ionic and metallic silver at low, non-toxic levels, providing a 99.99% reduction of a broad range of microbes on the matrix.^{1,2†} It is designed to support wound healing³ by conforming to wound-bed micro-crevices, maintaining a moist healing environment, and sustaining consistent reduction of microbial burden.^{1,2†}

- Conforms with transparency to the microtextures of the wound bed.⁴
- Sustained antimicrobial activity of ionic silver on the matrix.^{1,2†}
- Can be used at onset of wound treatment or in surgery, including in conjunction with other wound management technologies and solutions.
